**Goal accomplished – AXI.TECH GmbH to trade under the new name  
of Process.Ing LifeSciences  
Our Ref: 009HKU\_570B80BriefA\_24022009\_2**

”If things are to get better, they have to change“  
- Georg Christoph Lichtenberg –

Dear Sirs and Madams,

With this letter we would like to announce that from 1 April 2009, **AXI.TECH GmbH** will trade under the new name of **Process.Ing LifeSciences Group**.  
Let us walk the road together from Axima Pharma via AXI.TECH to Process.Ing LifeSciences Group.

**Preserving values, shaping the future**

As you know, AXI.TECH GmbH has evolved from Axima Pharma - a successful player on the pharmaceutical and biotechnology market since 1999 - by way of a management buy-out process. As part of the establishment of AXI.TECH GmbH in July 2007, the company's activities were restructured with the dual goals of focusing on customers in the life sciences industry and expanding our radius of action.

**Design, Build & Validation for the essentials of life**

What does that mean for our customers? As a company group, Process.Ing LifeSciences will unite under its umbrella specialist engineering contractors to offer you complete solutions tailored to your specific projects:

**Process plant engineering and construction –**

As a general contractor, we realize plant construction projects for you, offering fully integrated one-stop solutions from consulting via design and realization through to validation.

**Specialist products –**

We manufacture and supply modular product solutions in the segments of sterile formulation and fermentation plants, active airlock technology and clean room monitoring systems as well as treatment plants for the safe purification of pharmaceutical waste water.

**Engineering services –**

We provide the full spectrum of engineering services for the complete lifecycle of process and infrastructure facilities in the GMP environment.

By renaming to Process.Ing LifeSciences Group we are taking the last logical step on the path set by the establishment of AXI.TECH. The independence from our former parent company Axima GmbH puts us in a position to fully unfold our available knowhow in the life sciences sector for the benefit of our customers, to develop modular specialist products and also to operate on the global market.

No need to say that the validity of the existing contracts will remain unaffected by this change.

To find out more about our company, visit our website at [www.processing-lifesciences.de](http://www.processing-lifesciences.de) or read our publication in PROCESS PharmaTEC appearing on 24 February 2009.

Should you have any questions, please make sure to get in touch with us.

Best regards

AXI.TECH | BIOPHARMACEUTICAL ENGINEERING
